EDUCATION

Chitkara University

Bachelor of Technology in Computer Science & Engineering

- CGPA: 9.1 / 10.0

Chandigarh, India

2022 – 2026

EXPERIENCE

Software Engineer Intern

May 2025 – April 2026

Silverpush: AdTech Platform - Java, Spring Boot, Go, Microservices, React, Git, AWS, Docker On-site (Gurugram, Haryana, India)

- Shipped **Zimmer (zimmerhq.ai)**, an **AI-powered autonomous marketing SaaS** enabling brands to create and manage campaigns across **Google, Meta, and WhatsApp** using scalable **http microservices** for orchestration.
- Built **campaign journey architecture** with **WebSocket event-driven architecture** to support dynamic, real-time campaign execution logic and **error validations** for nodes throughout the campaign journey creation on frontend.
- Engineered **RESTful analytics APIs** to process real-time data, building **PostgreSQL-backed pipelines** for reach metrics and **LLM token cost tracking**, enhancing cost visibility and decision-making during campaign execution.
- Architected an **email delivery microservice**, incorporating **goroutine concurrency**, retry mechanisms, and external **SMTP integrations** (e.g. Amazon SES) to ensure high-throughput and fault-tolerant delivery of 1M+ emails per month.
- Architected **Stripe-inspired request logging system**, leveraging **middleware** and **context propagation** to produce single structured log per request, improving **distributed tracing**, debugging and observability across microservices.

Frontend Engineer Intern

Jun 2023 – Feb 2024

Cantilever Labs: EdTech Platform – MERN Stack, Reactjs, Mongodb, Expressjs

Remote (Telangana, Hyderabad, India)

- Resolved a critical **CORS issue** in a browser-based code compiler by rearchitecting **AWS Lambda** response headers, preflight request handling, and **API Gateway** integration, achieving a **99.9% reduction in runtime errors**.
- Integrated an **LSP server** hosted on **AWS EC2** with **React Monaco Editor**, delivering real-time language intelligence including **autocomplete**, diagnostics, code navigation, and contextual error detection for in-browser coding tasks.
- Developed an **in-browser IDE** supporting **HTML, CSS, and JavaScript** execution, enabling students to run projects directly on the platform without any local environment setup while maintaining **isolated runtime environments** and execution safety.

ACHIEVEMENTS

Codeberg Forgejo: Actively contributed to opensource codebase **3.5K+ stars**, collaborating with a global developer community, triaging issues, and submitting pull requests to enhance project (frontend-backend) functionality and maintainability. | [#PR](#)

GSoC: Contributed to **Google Summer of Code** organization **Rapid7**, improving open-source **Metasploit Framework** documentation while collaborating with maintainers and a global developer community. | [#PR](#)

Ripple.ts: Contributed to **Ripple.ts** codebase and documentation, a trending open-source web framework with **7.4K+ GitHub stars**. Optimising memory for AST Tree iteration on compile time. and fixed typos in official docs. | [#PR](#)

DSA: Solved 500+ DSA problems across platforms like [leetcode](#) , GFG and coding ninjas.

PROJECTS

BookMyShow | *spring-boot, MongoDB, Elasticsearch, Redis, JWT, Docker* | [GitHub](#)

- Developed a scalable **movie ticket booking API** in **spring-boot** with features like **search**, scheduling, and seat selection.
- Integrated **Elasticsearch** for full-text search, **Redis** for caching and implemented **JWT authentication** with **RBAC**.
- Designed a **pluggable payment system** (Paytm, PhonePe) with **middleware-based request logging** for observability.

Code Fusion | *Next.js, Express.js, MongoDB, Golang, gRPC, Docker, Kubernetes, Nginx, WebSockets* | [GitHub](#)

- Built a **cloud-based development environment** platform offering **on-demand workspaces**, supporting **Golang, and React.js** environments by leveraging Kubernetes to provision and manage isolated development containers dynamically.
- Implemented microservices architecture using **gRPC** for efficient, low-latency inter-service communication; orchestrated with Docker and Kubernetes, enabling independent service deployment, fault isolation, and improved system resilience.

TECHNICAL SKILLS

Programming Languages: Java, Golang, C++, Python, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks & Libraries: Spring Boot, Gin, Fasthttp, grpc, Node.js, Express.js, React.js, Nextjs, Redux-toolkit

Databases & Data Technologies: DynamoDB, PostgreSQL, MongoDB (sharded), MySQL, Redis, Elasticsearch, Kafka

DevOps & Cloud: Docker, Kubernetes, AWS (ECS, S3, EC2, Lambda,), GitHub Actions, Jenkins, CI/CD, GCP, Azure

Security & Authentication: JWT, OAuth 2.0, RBAC (Role-Based Access Control), Spring Security, Hashing, crypto

APIs & Integration: REST APIs, Microservices Architecture, Cloudinary, OpenFeign, ThreadLocal, API Gateway

Tools: Postman, Jira, Git, GitLab, Bitbucket, VS Code, IntelliJ, Chrome DevTools, Prometheus, Grafana, OpenTelemetry
